

Ali Koroglu

Full-Stack & Mobile Developer | Computer Engineering Senior

Trabzon, Turkey • alikorogluts@gmail.com • +90 546 903 6317

github.com/alikorogluts • linkedin.com/in/alikorogluts • grit.com.tr

Senior CS student building production-grade distributed systems with .NET, React, Flutter & Python ML. Teknofest award winner with two industry internships and production-level live projects.

WORK EXPERIENCE

Software Engineering Intern

Türkiye Ziraat Technology Inc.

Jul 2025 – Aug 2025

- Built a real-time messaging and file-sharing web app using React and TypeScript on the frontend.
- Integrated .NET Web API backend enabling instant messaging, image/file transfer and user management.
- Designed a type-safe, performance-focused component architecture with TypeScript.

Software Engineering Intern

Türkiye Halkbank A.S.

Aug 2024 – Sep 2024

- Developed an anonymous idea-sharing platform to boost employee motivation; team leads could evaluate suggestions strategically.
- Full-stack implementation: ASP.NET Core MVC, SignalR, Entity Framework, SQL Server, Bootstrap, AJAX.

Part-Time IT & Software Support Assistant

Artvin Coruh University — Artvin, Turkey

May 2023 – Jun 2023

- Provided basic IT and software support within the university.
- Assisted with software setup, troubleshooting and maintenance of computer systems.
- Supported students and staff with technical issues in the computer lab environment.

FEATURED PROJECTS

DeepSecure — Distributed DeepFake Detection Platform (Graduation Project)

Next.js 14 | .NET Web API | Python ML Worker | RabbitMQ | Clean Architecture

2025 – 2026

- Built a distributed deepfake detection platform using .NET Web API, Python ML worker and RabbitMQ message queues with asynchronous microservice-style communication between services.
- Implemented Clean Architecture and N-tier design on the backend; Python microservice consumes analysis jobs from RabbitMQ and returns CNN, ELA and FFT scores.
- ML pipeline includes CNN confidence scoring, Error Level Analysis (ELA), FFT anomaly detection and GradCAM visualisation; trained on the TERAS dataset.
- Frontend: Next.js 14 (App Router) + TypeScript with Atomic Design; real-time polling, result dashboard, EXIF metadata panel, CSS design token system for light/dark mode.

Stack: Next.js 14 | TypeScript | .NET Web API | Python | CNN | ELA | FFT | GradCAM | RabbitMQ | Clean Architecture | TERAS Dataset

Frontend: github.com/alikorogluts/DeepSecure-DeepFake--Web

Backend API: github.com/alikorogluts/DeepFake-.NET-WebAPI

ML Worker: github.com/cihanoren/DeepFake-python

Habit Tracker — Habit Tracking Application

.NET | Supabase | Next.js | RabbitMQ

2025 – 2026

- Scalable .NET backend with async MQ-based architecture; Supabase (PostgreSQL) for database and auth.

- Next.js SSR frontend with habit tracking, notification system and analytics dashboard.

Stack: [.NET](#) | [Supabase](#) | [Next.js](#) | [RabbitMQ](#) | [PostgreSQL](#)

Teknofest 2024 — Rockfall Early Warning System | 6th Place in Turkey (82.60/100)

[Autonomous Drone](#) | [OpenCV](#) | [SignalR](#) | [Python](#)

2024

- Autonomous drone patrol + OpenCV image processing for risk analysis; SignalR real-time alert system.

Attendance Tracking System — [yoklama.somee.com](#)

[ASP.NET Core MVC](#) | [Flutter](#) | [Firebase](#) | [SignalR](#)

2024

- Dual-platform: web (ASP.NET + EF + SignalR) and mobile (Flutter + Firebase push notifications).

GRIT Corporate Website — [grit.com.tr](#) (Freelance / Live Production)

[ASP.NET Core MVC](#) | [Bootstrap](#) | [SQL Server](#)

2024 – 2025

- Designed and developed the full corporate website for GRIT (disaster-risk analytics company) as a freelance project; bilingual (TR/EN), SEO-optimised, GDPR/KVKK-compliant, news/blog and product catalogue modules.

TECHNICAL SKILLS

Languages: C#, Python, TypeScript, JavaScript, SQL, C, Java

Backend: .NET Web API, ASP.NET Core MVC, SignalR, Entity Framework

Frontend: React, Next.js, TypeScript, HTML, CSS, Tailwind CSS, Bootstrap

Mobile: Flutter

Infrastructure & Tools: RabbitMQ, Docker, Git, GitHub, SendGrid

Data & Cloud: SQL Server, PostgreSQL (Supabase), Firebase

Computer Vision / ML: Python, OpenCV, CNN, ELA, FFT, GradCAM

Architecture: Clean Architecture, N-Tier, Microservices, REST API, Atomic Design

KEY INTERESTS

Distributed Systems • Backend Architecture • Machine Learning • Computer Vision

EDUCATION

B.Sc. Computer Engineering (Senior — 4th Year)

[Artvin Coruh University](#)

2022 – Present

ADDITIONAL TRAINING

ASP.NET Core, C#, Python Programming (Udemy / Btk Akademi, 2023–2024)

LEADERSHIP

Knowledge & Growth Community — President

[Artvin Coruh University](#)

Oct 2022 – Jun 2023

- Led a 100+ member student community; organised technical workshops, hackathons and industry meetups.

LANGUAGES

- Turkish — Native
- English — Intermediate (B1) / Technical Reading Proficiency
